

Summary of Role:

GLOBALFOUNDRIES Fab9, Burlington, VT is seeking an individual to join their site Emergency Response Team as a Senior Technician. This individual will be required to have leadership skills and be self-motivated. As part of the site Environmental, Health, Safety and Security team, this individual will respond to fires, medical emergencies, hazmat and all other emergency incidents to protect life, environment, property, and support continuous manufacturing operations. The Senior Technician participates in fire system inspections, training exercises, and equipment maintenance activities. Technician positions are hourly shift positions working a compressed week of 12-hour shifts. **GLOBALFOUNDRIES** is a 24/7 manufacturing facility providing technician support across all shifts.

Essential Responsibilities:

- Strong written and verbal communication skills
- Capable of performing multiple tasks at various levels of complexity
- Self-Motivated / Team oriented
- Troubleshoot Incidents / Events
- Assist with Environmental, Safety, and Security tasks as assigned/needed
- Coordination of resources for effective response and containment
- Perform all activities in a safe and responsible manner and support all environmental, health, safety & security requirements and programs

Required Qualifications:

- High School education or equivalent
- Emergency Medical Service licensure in Vermont
- Physical Capacity Demands: walking, repetitive motions, lifting and / or wearing equipment weighing up to 60 lbs.
- Language Fluency – English (Written & Verbal)

Preferred Qualifications:

- Firefighter I Certification
- CPR certification
- Hazmat Technician
- Manufacturing Operations experience (3 Years)
